About UXA Resources Limited

UXA Resources Limited (ASX:UXA) is a diversified explorer that has assembled a pipeline of highly prospective tenements throughout Australia, targeting the discovery of base metals (copper-gold, lead-zinc-silver) coal and uranium deposits, all located within world class mining provinces and close to existing infrastructure. UXA has formed strategic joint venture agreements with significant partners which provide additional capital and scope to accelerate the company's major exploration programs.

UXA is also the 100% owner of GAA Wireline, a borehole logging business that provides UXA with another revenue stream channelled towards exploration. GAA have several long term USA and Australian based service contracts covering the coal, coal seam gas, iron ore and uranium sectors. GAA owns the exclusive rights to PFN technology, a unique borehole logging tool that provides immediate uranium analysis in the field and was used in the Beverley and the Four Mile uranium discoveries in South Australia.

In New South Wales and South Australia, UXA has signed an option agreement with Teck Australia Pty Ltd (a wholly owned subsidiary the major Canadian mining company Teck Resources Ltd) and has completed

2,650m infill and step out drilling at the Dome 5 zinc-silver-lead prospect, located 50km from Broken Hill and in close proximity to the main railway corridor. In addition to the original 5 hole discovery made in 2007 by Teck and PlatSearch, UXA's drilling has identified a significant zone of Mississippi Valley Type (MVT) mineralisation.

In South Australia, UXA's Joint Venture with Straits Resources Limited allows Straits to explore nine of UXA's Stuart Shelf tenements for IOCG(U) deposits, a region that host the world class Olympic Dam, Prominent Hill and Carapateena deposits. Straits has the right to earn a 70% interest in the tenements by spending \$10 million on exploration over seven years.

In the Northern Territory, UXA is the operator of the Nabarlek and Pandanus West joint venture with RIL Australia Pty Ltd, a subsidiary of Reliance Industries Limited, one of India's largest private sector companies. Following successful airborne geophysical surveys and the recent U40 uranium discovery located within 280m of UXA's Nabarlek North tenement, a major drilling program is currently underway targeting unconformity style uranium.

In Western Australia, UXA has assembled five tenements and formed agreements with Rey Resources Ltd to explore for sandstone hosted uranium and P. Askins to explore for coal and uranium. The project area is located immediately west of the Canning coal field basin, south east of Derby and close to a major sealed highway. Two of the licences cover major radiometric anomalies and UXA was awarded a grant of \$100,000 by the WA Government to co-fund exploration for uranium.
