

# UXA Resources Limited

ABN 65 112 714 397

## **Senior Exploration Geologist**

- Multiple commodity focus
- Growing team of professionals
- Strong exploration portfolio
- Excellent career development and training

UXA Resources Limited is a diversified junior explorer with big aspirations and boasts an extensive tenement portfolio with a pipeline of projects in multiple commodities strategically positioned across Australia. Clearly focussed on the discovery and development of commercial grade uranium, base metal, copper and gold mineralisation, UXA is now in a strong period of growth and looking to expand its team with a dedicated and passionate Senior Exploration Geologist.

As an integral member of a small team of professionals, you will be responsible for undertaking and leading all field exploration activities including land access negotiation, detailed geological mapping, planning and implementing geochemical surveys, geophysical surveys and drill programs. In addition you will be responsible for all facets of data capture and processing, interpretation and modelling as well as technical reporting. You will mentor and train junior staff, participate in relevant research and development projects to strengthen the company's understanding of mineralisation processes within its tenements. You will trial new exploration ideas, concepts and techniques in order to stand out and lead the exploration industry.

Tertiary qualifications in Geology are essential along with at least 5 or more years relevant "hands on" exploration experience. The successful applicant will also possess strong computer literacy skills and be able to demonstrate excellent leadership, project management, geological modelling & interpretation skills, as well as strong communication and interpersonal skills while committed to building and maintaining the highest standards of safety practice.

Mineral discovery is rarely made from an office desk and therefore UXA is seeking a highly motivated person keen to travel throughout remote regions of Australia for extended periods in their quest for exploration discovery success. Remuneration will be negotiated based on qualifications, demonstrated experience and personal achievement.

The diversity of this position will comprise responsibilities for providing vital technical input across the areas of –

- Target generation
- Planning, implementing and supervising mapping, sampling and drilling programs
- Logging of diamond drill core and chip samples
- Liaising with and supervising contractors
- Compilation and interpretation of exploration data
- Supervision of geologists, field staff and contractors
- Ongoing research and development of exploration models
- Ongoing research and implementation of thick cover geophysical exploration methods

This is a permanent salaried position and a competitive remuneration package will be negotiated with the right candidate(s) based on qualifications and experience.

On offer is –

- A healthy work / home balance
- An autonomous and team work environment
- Exposure to numerous geological environments and mineralisation styles
- Ongoing training and mentoring
- Opportunity for career advancement with company growth

This is an exciting opportunity to utilise your education, skills and experience to help develop the future direction of this expanding Company.
